How to determine if an article is worth requesting through Interlibrary Loan.

- How long is the article? Check the number of pages. A short article is not likely to be original research. Remember, journals that carry peer-reviewed articles also carry book reviews, letters to the editor, editorials, commentaries, and essays. These are not considered “evidence” and are not peer-reviewed.

- Example:
  While *The Nurse Practitioner* is a peer-reviewed journal, not all content consists of peer-reviewed articles.

You can limit your selection to longer articles by using the number of pages limiter on the 1st page of CINAHL.
