How to search PsycInfo for articles that contain appended research instruments, e.g., those located in the appendix of the article.

When some or all of a research instrument is included in the article, this is specified in the EBSCO PsycInfo Detailed Record with the word *appended* in the Tests & Measures field, as shown below.

*Appended* typically means one of three things:
- The full instrument is included as an appendix to the article.
- Items from the instrument are reproduced in a figure of a table
- Items from the instrument are described in the Methods section.

To find these articles, conduct a search as follows:

1) Search by keywords (to represent variables); use the term *appended* in a search box, then select the field *Tests & Measures* to the right.
From this search we found an article that includes in its appendices the *Revised Child Anxiety and Depression Scale-25 Parent Report* (excerpted below):

**Appendix**

**RCADS-P-25**

*Please Put a Circle Around the Word That Shows How Often Each of These Things Happen for Your Child*

1. My child feels sad or empty.  
   Never, Sometimes, Often, Always

To limit your results to a specific instrument, see the example below. Enter the exact name of the research instrument in an additional search box.

Within the article, *Age differences in optimism bias are mediated by reliance on intuition and religiosity,* is the *Creationist Beliefs Questionnaire*, excerpted below:

---

 moderate) the age–optimism bias association would shed additional light on the nature and development of optimism bias.

**Appendix: Creationist beliefs questionnaire**

On a 4-point scale, participants indicated how strongly they agreed or disagreed with each of the statements below.

1. God created the world in 7 days. (C)
2. The humans of today look just as they did when God created them. (C)
